

CASHLESS CATERING

By clicking 'Give Consent' for 'Cashless Catering' on the Parent Portal/Arbor App you are consenting to the following:

We operate a cashless biometric catering system for the purchase of school meals.

Our online dinner money payment provider is the Arbor Portal, where parents and carers will have their own individual account, allowing you to conveniently add money and pay for your child's school meals in advance.

The system is designed to make purchasing meals simple, secure and efficient, without the need for students to carry cash or use physical money in school.

If your child is entitled to free school meals, the process for purchasing food remains exactly the same; the biometric system will identify the student at the point of purchase, and the appropriate meal entitlement will be applied.

The biometric registration process will take place in school during the first few days of the September term, ensuring that all students are registered and ready to use the system.

Further information and guidance on accessing and using the Arbor Portal will be provided to parents and carers.
