# Curriculum Policy rev. Sept 2023

**Date Reviewed:** September 2023

**Date of Next Review:** September 2024

**Reviewed by:** Quality of Education Governors

#### Aims of the Curriculum

"Curriculum is the main substance to Education" | Ofsted 2019

At Moorside, we're all about excellence! We push our students to achieve their full potential and go even further. With a focus on academic achievement, we provide opportunities that set our students up for success. We aim high to exceed beyond expectations.

Our curriculum goes beyond the classroom. We develop skills such as critical thinking, creativity, and adaptability to enable students to succeed. Students engage in a range of enrichment opportunities that challenge and inspire.

Students enjoy school and leave Moorside with a strong moral compass rooted in the British values of mutual respect, tolerance, and personal responsibility. We empower and inspire our students to reach their full potential and make a positive impact in their local, national, and global communities.

#### Intent

- Pupils achieving the highest standards possible at key stages 3 and 4 as well as being prepared well for the transition to Post 16 studies.
- Pupils becoming more resilient and skilful at reasoning, information processing, enquiring, creative thinking, evaluating, and problem solving.
- Pupils developing the real-life skills to be more creative, independent, and reflective learners and to be more effective team workers and effective self-managers.

- Pupils being more effective participators in the local and global community.
- Pupil being engaged and motivated and see the relevance of their learning in modern society.

#### We want our pupils to become:

- Successful and positive learners who enjoy, progress, and achieve well and with a
  positive mind set.
- Confident individuals who live safe, healthy, and fulfilled lives
- Responsible and active citizens who make a positive contribution to society and their environment.
- Proud to achieve well and see inspiration in celebrating success.

#### **Implementation**

In Key Stage 3, our curriculum has been designed with a broad suite of traditional subjects. Students study Maths, English, Science, French and German, History, Geography, RE, Drama, Art, Technology, PE, Music. Progression maps have been designed to ensure both a secure transition to Key Stage 4 and to enable skills to be transferred and applied across the curriculum.

Our focus in lessons is on key processes and skills as well as knowledge and concepts. Teaching strategies such as collective memory, reading images and fortune lines have been demonstrated and adopted by subjects. Personal Learning and Thinking Skills are developed through subjects; there is a real focus on these skills through the 5 Personal Development Days which occur throughout the year. These are calendared and incorporate Careers education and guidance, and curriculum pathways. Our Key Stage 3 curriculum develops the skills required in time for a positive start to the Key Stage 4 curriculum in Year

Our key Teaching and Learning priorities this year are to continue to develop and enhance the use VIPERS, retrieval practice strategies and formative assessment (via the EEF project). Furthermore, to build mastery into the curriculum and ensure there is a 'golden thread' focussed on RADY students running throughout all that we do. For our year 7 curriculum our focus is to incorporate the use of one-to-one devices into the Year 7 curriculum.

Our Key Stage 4 starts in Year 9 for all subjects to enable a mastery approach to learning. It also allows us to be more synoptic in our coverage. The additional year allows the time to deepen understanding, incorporate deliberate practice skills and consolidation tasks so that learning can move towards the 'long term' memory stage. We offer a broad mixture of traditional GCSE subjects as well as vocational and BTEC courses in Sport, Technology, Hospitality and Catering, and Music.

Pupils also study vocational based courses in ICT. In each cohort an increasing majority of students study a full suite of EBacc subjects. For a small number of pupils there is an opportunity to access a more vocational curriculum with time built in to support the development of key functional skills including numeracy and literacy, which are required for them to be successful post-16. Market research during the options process helps us to tailor the curriculum to the changing needs of our pupils.

#### How do we organise our Curriculum?

In Year 7 pupils are placed into carefully stratified mixed attainment teaching groups. All subjects are delivered in these teaching groups apart from Art, Technology and PE where the year group is divided into two bands so that the group size can be reduced to ensure Health and safety requirements are met.

### Moorside High School

The stratified groups are constructed to ensure the same proportion of higher, middle, and lower attainers are included in each group as well as an equally proportioned RADY and SEND pupils.

Class	Approx. size
Н	26
I	28
J	26
К	27
L	26
М	27

In Year 8 pupils are placed in teaching groups based on ability. They are taught all subjects in these teaching groups apart from Technology and PE, where the year group is divided into two bands so that group size can be reduced to ensure Health and Safety requirements are met.

Pupils are placed in teaching groups, initially based on Key Stage 2 results, and subsequently using internal tests and exams. These are reviewed termly.

H is highest ability and M lowest ability.

Class	Approx. size
Н	32
I	32
J	31
K	26
L	24
M	18

#### **Key Stage 4 Curriculum**

In Year 9 pupils are placed into carefully stratified mixed attainment teaching groups. All Core subjects are delivered in these teaching groups. Option blocks are mixed attainment groups. All students take 'humanity' subject. In our current Year 9 cohort 120 out of 158 (76%) students' study for the English Baccalaureate qualifications taking both a humanity and a language.

Years 10 & 11 pupils are split into two bands for Core subjects and these subjects then set within the band. There are six sets for English, Maths, Science, ICT (Y11 only), Citizenship/RE and PE. Option blocks are then organised so that we can, whenever possible, create sets for optional subjects. Students in sets 1-4 study for the English Baccalaureate qualifications (so must opt for a language and History or Geography). Set 5 must opt for 'a humanity' but sets 6 and 7 have free choice of all subjects. This ensures we are making progress towards the Government's EBacc target of 90% by 2025, while the curriculum remains broad and accessible to all students.

#### **Statutory curriculum**

Compulsory subjects are English, Maths, Science, Computing / IT, PE, RE. These subjects are taught in discrete subject lessons. Additionally, Citizenship, Sex Education, Careers and Work-Related Learning are compulsory subjects taught across-the-curriculum.

Careers provision, RSE, Citizenship, Enterprise and Personal Development are delivered through Personal Development Days. These collapsed timetable days run for all year groups five times during the academic year to ensure full coverage of the statutory requirements of the curriculum.

#### The Entitlement Areas

Our 'Pathways' choices enable the requirement for pupils to opt for a minimum of one course from each of Arts/DT subjects, Humanities and MFL to be met. To enable some flexibility of choice at Key Stage 4, some market research is necessary and several models for option pools are floated to see which has the best fit with pupil choices, considering staffing and timetabling constraints.

In 2023 a range of new subjects for KS4 were introduced including several new BTEC courses. The additional subjects on offer are; BTEC s in Travel & Tourism, Enterprise, Health & Social Care and GCSEs in Film studies and Psychology,

#### **Support / Withdrawal Teaching**

Students on the SEN Register who require additional one-to-one tutoring to meet their needs may be withdrawn from specific lessons to access support from SENSS<sup>1</sup> tutors, TAs<sup>2</sup>, or Dyslexia Institute staff. These periods will be negotiated with staff and where possible, withdrawal from a specific subject will not take place for periods longer than a half term block.

#### 2023-24 Proposed Curriculum Model

The proposed models show the subject and number of lessons over a two-week timetable, with a total of 50 lessons over the fortnight.

Year 7 (160 pupils) Highlighted classes are split into 4 smaller classes of 20 based upon 3 of the sets.
